## 2 Install Konica Minolta Bizhub c360i on MacOS

4. Open „.dmg” file. In Finder on the left side we have bizhub directory, open it and run „.pkg” file

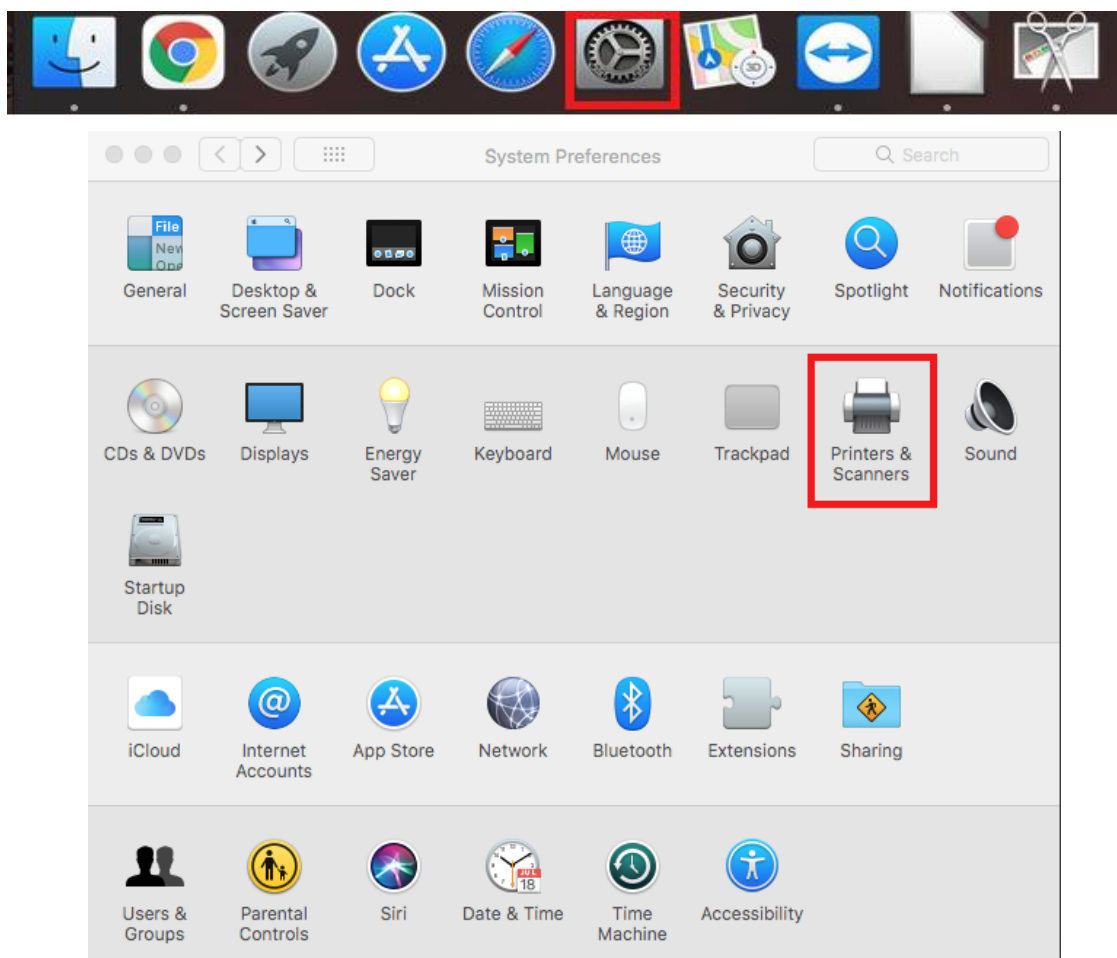

5. Run wizard, and install it with default settings.

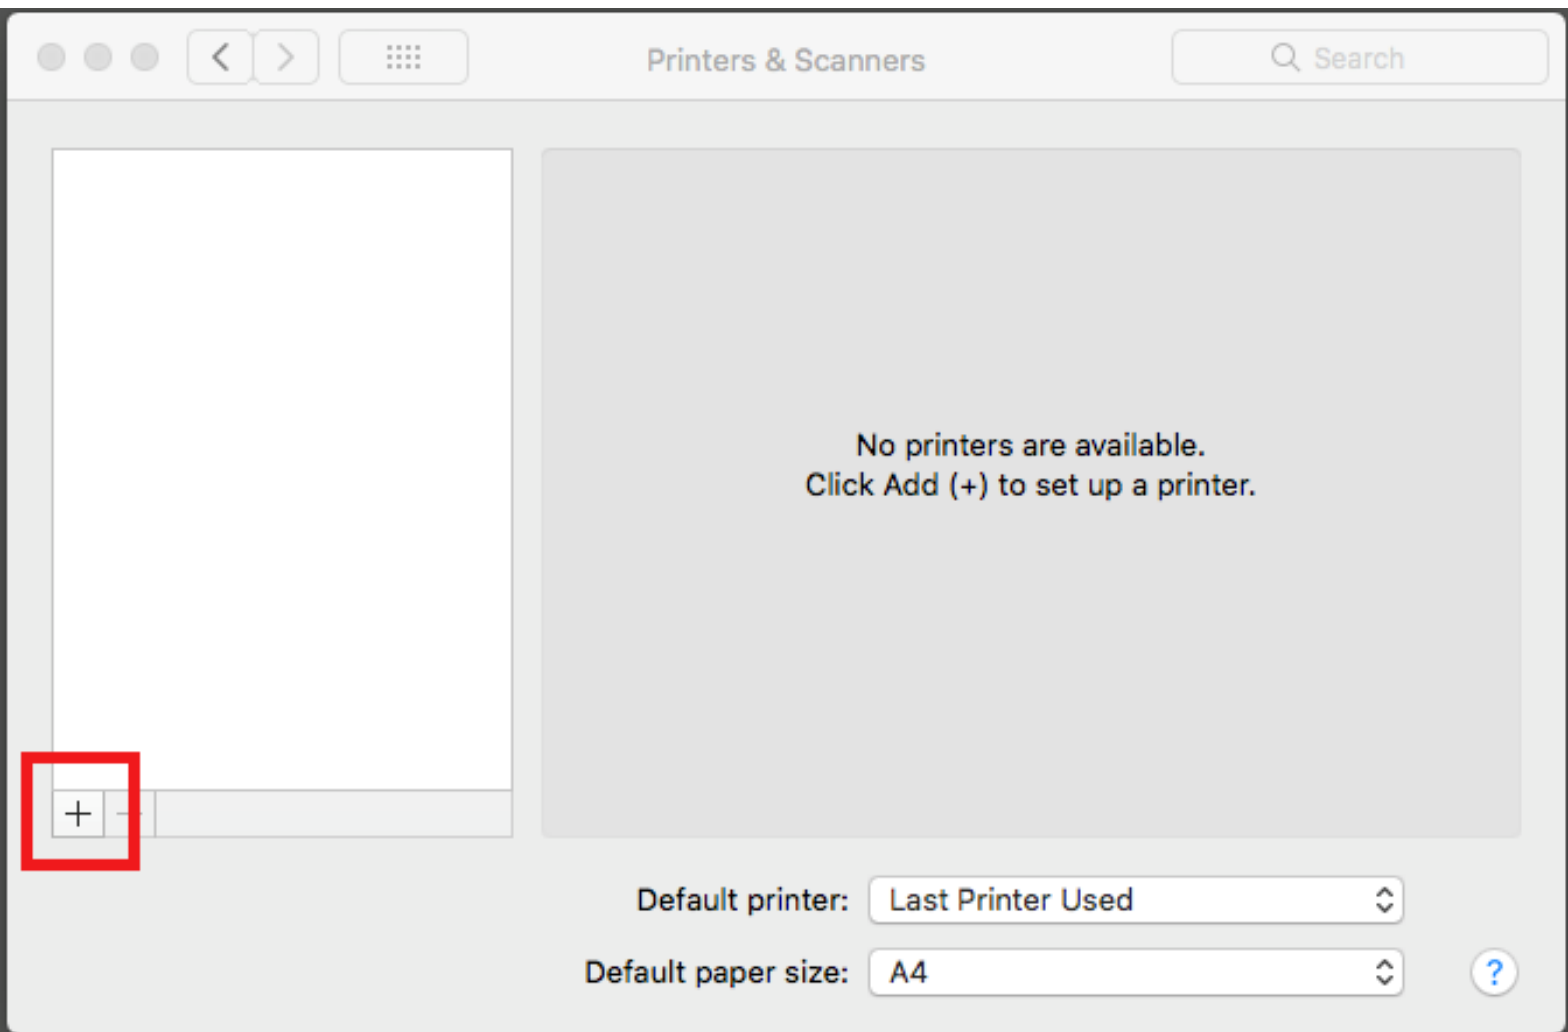

## Step 2 – Install printer

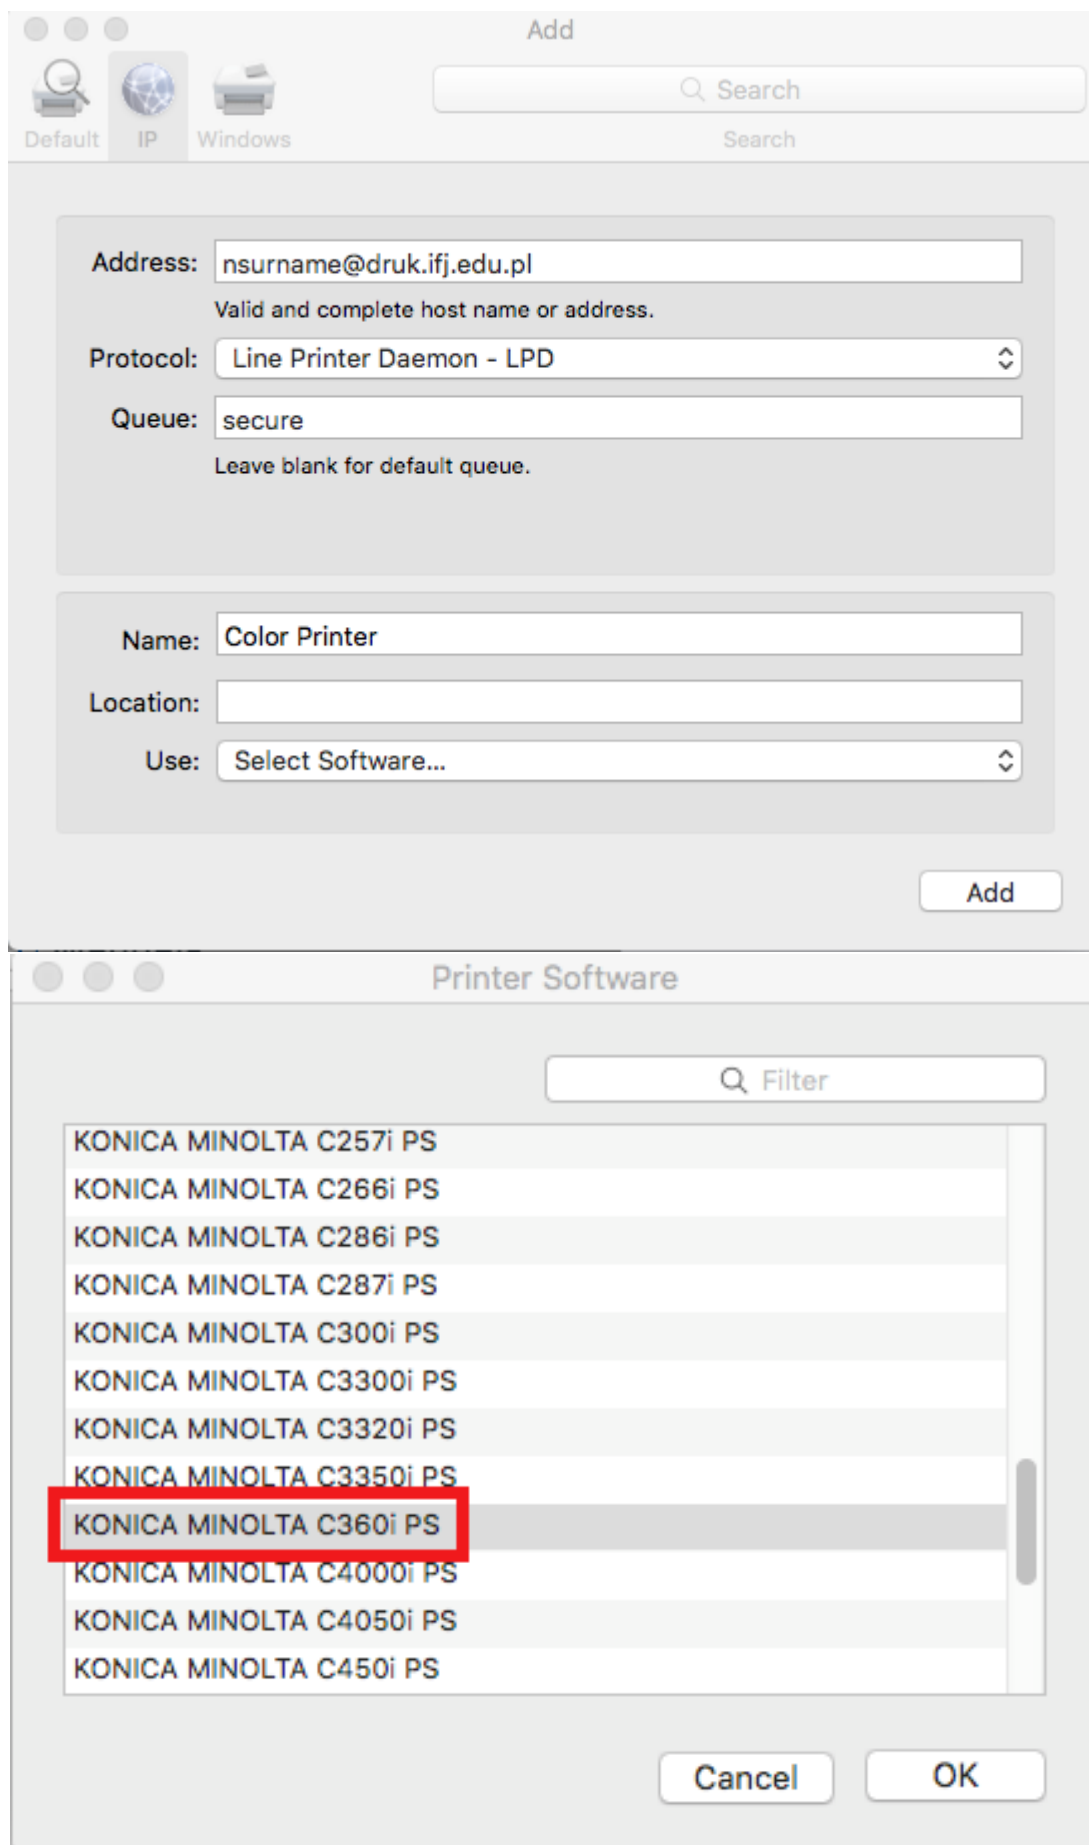

1. Go to „System Preferences” and next „Printers & Scanners”

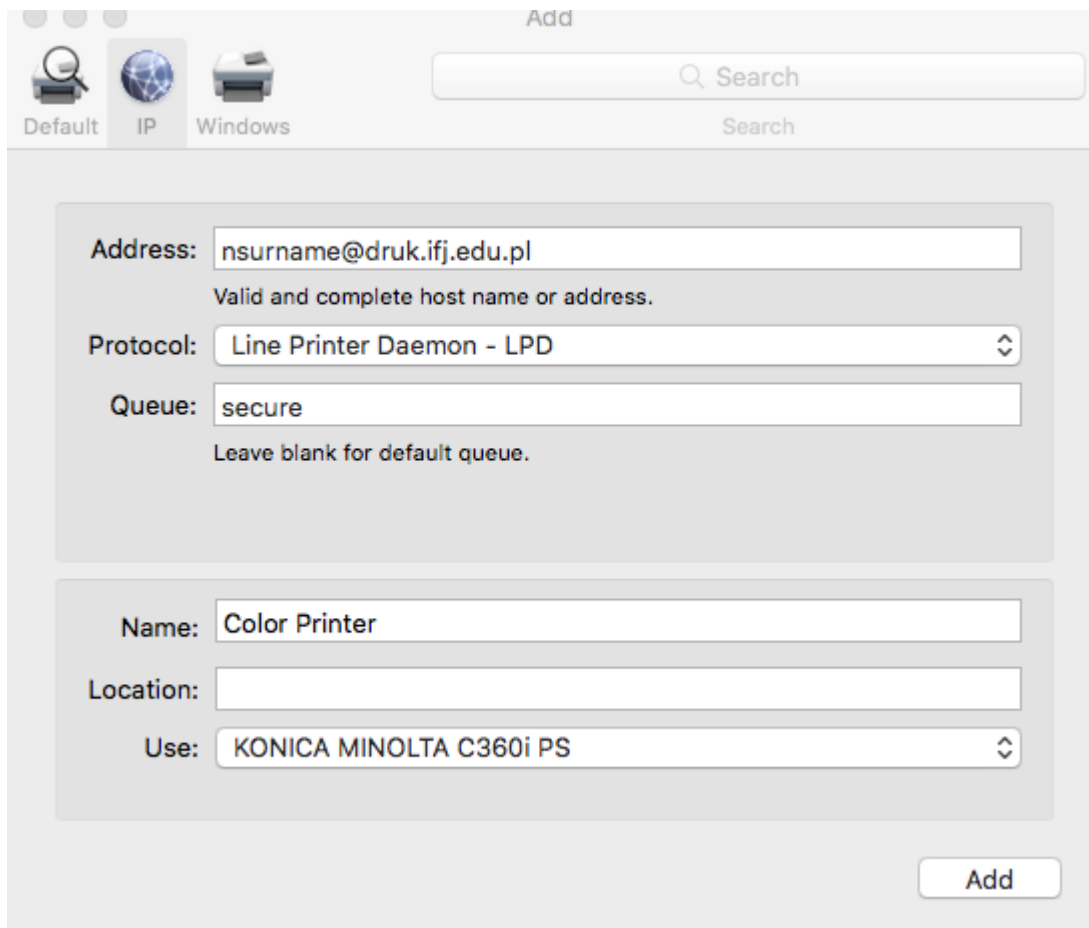

2. Click on „+” button and choose „New printer or scanner”

- Choose „IP” on top and type this:
- In address type first letter of your name and full surname with server address  
example: nsurname@druk.ifj.edu.pl
- Protocol – keep default
- In queue type „secure”
- Click „Use” „Choose software” -> find and click on „Konica Minolta C360i PS”

The screenshot shows the 'Add' printer dialog in macOS System Preferences. The dialog is titled 'Add' and has a search bar at the top right. Below the search bar are three tabs: 'Default', 'IP', and 'Windows'. The 'IP' tab is selected. The dialog contains the following fields:

- Address:** nsurname@druk.ifj.edu.pl  
Valid and complete host name or address.
- Protocol:** Line Printer Daemon - LPD
- Queue:** secure  
Leave blank for default queue.
- Name:** Color Printer
- Location:** (empty field)
- Use:** KONICA MINOLTA C360i PS

An 'Add' button is located at the bottom right of the dialog.

3. Click on Add, and you have installed a printer
