

# Wi-Fi – Connecting to „IFJ” wireless network [Mac OS]

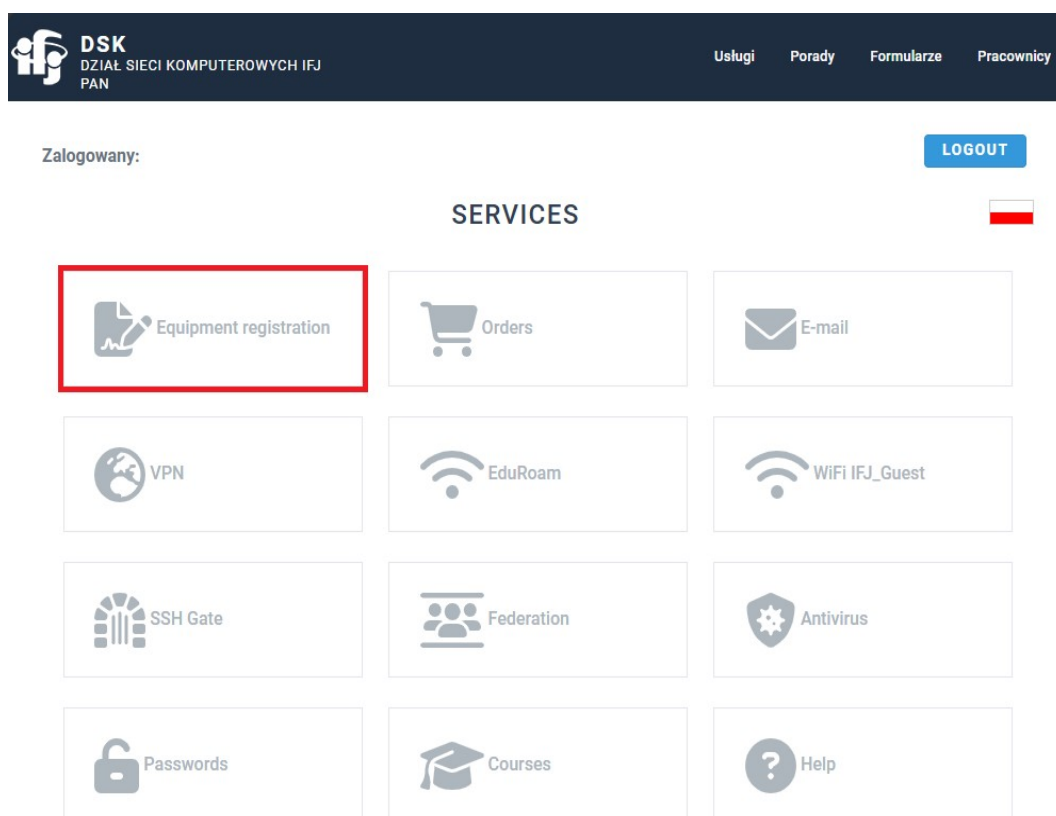

## Step 1 – Device registration on net.ifj.edu.pl

1. In order to connect the device to the wireless network, it has to be registered on the [net.ifj.edu.pl](http://net.ifj.edu.pl) site.

The screenshot shows the login page of the net.ifj.edu.pl website. At the top, there is a dark blue header with the IFJ logo and the text "DSK DZIAŁ SIECI KOMPUTEROWYCH IFJ PAN". To the right of the header are links: "Usługi", "Porady", "Formularze", and "Pracownicy". Below the header, the text "SIGN IN" is centered. Underneath, there are two input fields: "Login:" with the placeholder "name.surname@ifj.edu.pl" and "Password:" with a masked password "\*\*\*\*\*". A blue "SIGN IN" button is positioned below the password field.

2. After login in, click *Equipment registration* button.

The screenshot shows the services page of the net.ifj.edu.pl website after a successful login. The header is identical to the previous page. Below the header, the text "Zalogowany:" is on the left, and a blue "LOGOUT" button is on the right. The main content area is titled "SERVICES" and features a grid of 12 service tiles. The first tile, "Equipment registration", is highlighted with a red border. The other tiles are: "Orders", "E-mail", "VPN", "EduRoam", "WiFi IFJ\_Guest", "SSH Gate", "Federation", "Antivirus", "Passwords", "Courses", and "Help". Each tile contains an icon and the service name.

## Wi-Fi – Connecting to „IFJ” wireless network [Mac OS]

- a. Fields *Hostname* and *Inventory number* applies only to IFJ devices, and are given out by DSK and DFK/DZI departments.

When registering a private device, these fields can be skipped.

- b. Mac Address – It can be found in **Wi-Fi settings**. Open it and click on “details” button next to Wi-Fi. Then choose “Hardware” on the left side of window. **Remember** that portable computers, e.g. laptops, could possess 2 networking cards – for wired and wireless connections. If that is the case for your device, you need to input both addresses.

### Step 2 – Connecting to wireless network

---

1. When the device is registered, you can connect to the wireless network. Click the *Network* button on the top of the screen, turn on Wi-Fi and click on “IFJ”

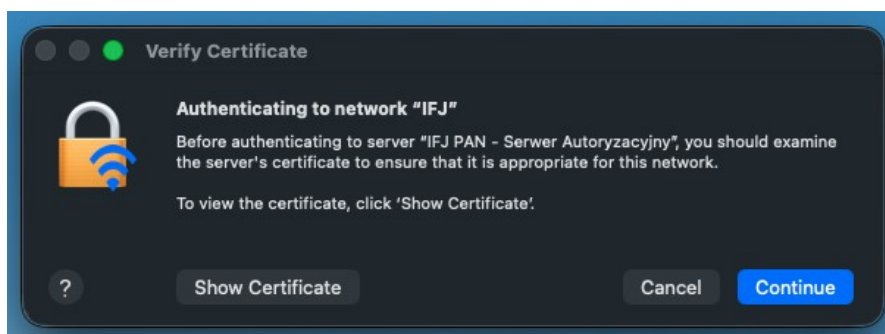

2. Input your login and password, the same as to *net.ifj.edu.pl*, click *OK*, and then *Connect*.  
**ATTENTION:** Your login has to be given in full/long form – name.surname@ifj.edu.pl
